Forecast for Friday 11 Oct 2024

Weather: A few showers, likely wintry on higher summits, possible through the early hours, otherwise dry with long clear spells. Then a bright day with some good spells of sunshine around. Still the odd light shower possible, again wintry on higher summits, but most places dry. Mainly dry with clear spells through the evening.

Chance of cloud-free hill tops above 800m: 90%.

Low Cloud and visibility: Occasional cloud above about 600-800m in north until late afternoon, otherwise little or no cloud expected below the summits through daylight hours. Away from cloud visibility excellent with good panoramic views of hills falling briefly in showers.

*Level above which ground is expected to be frozen/snow is expected to settle.

Meteorologist's View

Significant chill expected on the summits despite the sunshine.

Forecast for Saturday 12 Oct 2024

Weather: Becoming rather cloudy overnight but a dry start to the day but outbreaks of rain edging south, the rain perhaps persistent and heavy for a time in the early afternoon. Rain turns lighter and patchier from mid-afternoon afternoon before clearing in the evening and the cloud breaking.

Maximum wind: Southerly or southwesterly 10-15mph veering, in the early afternoon, westerly or northwesterly 25-30mph, gusts around 45mph over higher summits and ridges, then easing 15-20mph through the evening.

Chance of cloud-free hill tops above 800m: Around 25% in west but nearer 60% in east, improving to 75% in evening.

Low Cloud and visibility: Periods or persistent, but more occasional at times in east, above 600-750m, perhaps patches lower in west in more persistent rain, becoming occasional through the evening across the area.

Temperature: **Valleys:** Around 4 or 5 Celsius at dawn rising to 11 or 12 Celsius by day
 At 800m: Around plus 4 or 5 Celsius, falling to zero Celsius later
 Freezing level: Above the summits, falling to 800m later
